There are many things we can do for our planet!

## SAY NO!

When we are about to purchase something we check out the quality and the price of the item. Rarely do we consider the type of packaging it comes with, though it greatly affects the cost of what we buy.

Normal consumers are unaware of how much they are spending in this way for paper, cardboard and plastic, used for making boxes, covers and containers which they quickly throw out after unwrapping food items or new purchases.

Let's build awareness as to the expenses and waste involved in the use of plastic, blisters and paper to wrap up whatever we buy. Does everything NEED the packaging it is sold with? Is double or triple packaging always necessary? Does it improve the quality of what you buy?

Cut out pictures from old magazines, or make your own drawings, and use them to illustrate the topics mentioned on this page.

Are you attracted and fooled by the colour and design of the packaging of what you buy?

*BE CLEVER and look out for alternatives without so much packaging!*

## WE CAN MAKE THE DIFFERENCE!
