There are many things we can do for our planet!

LET'S SAVE WATER!

If you put a brick or a bottle full of sand in the WC tank, you can reduce the consumption of water every time you use it and save up to 4000 litres of water per year! And you can save up to 18 litres of water by just remembering to turn off the water tap when you brush your teeth!

Cut out pictures from old magazines, or make your own drawings, and use them to illustrate the topics mentioned on this page.

Water is a precious life giving resource, and yet some people need to walk miles before finding safe drinking water to cook with, or to simply quench their thirst! So don't waste water!

WE CAN MAKE THE DIFFERENCE!
